

Event Planning Project

Planning takes a lot of thought. You have to consider details that will make your event enjoyable. In addition, all of your decisions must be made within the boundaries of your budget.

For this project you are an event planner. You have been allocated \$2500.00, and must plan an event for 50 people. Using the internet for research purposes, plan your event.

You have the freedom to determine your event. You must provide details for the following categories:

- Location
- Transportation
- Lodging
- Food
- Tickets/Admission
- Supplies (items necessary for the event)

It is important for you to remain within your budget allocation.

HAPPY PLANNING
